

## What is advanced driving about?

Advanced driving is about anticipation and forward planning. Reading the road ahead and getting clues will help you anticipate and plan much more effectively. Apart from the official road signs there are many clues on your road which many don't see, or see but don't react to.

This is where advanced driving techniques are of such great benefit. An advanced driver makes progress so smoothly with so little apparent effort or fuss that they appear to respond to situations automatically. The reality is that by continuous concentration and thought they have turned their driving into a fine art.

Every hazard and driving operation presents problems which can only be solved by thinking. Thoughtful drivers apply the appropriate features of the system and carry out every operation and manoeuvre in plenty of time, consequently they are always in the right position, traveling at the right speed and in the right gear for any situation.

Remember early vision = early decision.

Think S.S.S.P Safe. Systematic. Speed aware. Smooth. Progressive. In that order.
